

We help businesses simplify a complex technology world.

IT Services

Our proprietary Office-as-a-Service delivers best-in-class Managed IT Services and drives transformational results. We manage all aspects of your IT products and services and craft a suite of offerings specifically tailored to your business needs.

Increase employee productivity and reduce administrative burdens

- Reduce IT and administrative burden by offloading routine tasks to our dedicated experts
- Boost employee productivity and avoid excessive investment in highly specialized IT assets and talents

Establish a single-point-of-accountability for the management of IT assets throughout their lifecycle

- Manage end-to-end IT asset lifecycle: planning, procurement, deployment, maintenance, and upgrades
- "One number to call" for all your IT needs; prevent finger pointing and responsibility-shirking in a multi-vendor environment

Deploy best-in-class technology on demand and at scale without overinvestment

- Deploy game-changing solutions with greater agility and scalabilities to meet your dynamic business needs
- Reduce capital expenditures by eliminating the need for a full-blown infrastructure
- Access enterprise-level IT infrastructure without the enterprise-level budget

Optimize business uptime and ensure survivability against cyber or natural disaster threats

- Minimize regulatory, financial, and operational risk exposures that are inherent in modern technologies
- Constantly refine security procedures to maximize disaster preparedness against rapidly evolving threats

You bring the people
and office space.

We will bring
everything else.

We focus on delivering you a
peace of mind so that you can
focus on what you do best.

Infrastructure as a Service

- Optimize network and endpoint performance through fully managed expert oversight, deployment, and round-the-clock monitoring
- Simplify asset management and institute reliable, efficient network function with a uniform hardware portfolio
- Deploy tailored technological solutions on a subscription basis while avoiding a large upfront cost

Unified Communications as a Service

- Increase efficiency through enhanced user mobility and multiple communication platforms for voice, chat, video-conferencing, and other collaborative tools, all within a single pane of glass
- Standardize telephony infrastructure without capital investment loss on aging equipment and concerns for end-of-life mandates
- Create an ecosystem of call centers, sales offices, remote locations, and teleworkers using a unified enterprise cloud collaboration
- Leverage our 20 years of industry know-how to develop a customized UCaaS deployment roadmap that minimizes operational disruption and ensures a superior end-user experience

Security as a Service

- Reduce the risk of cyberattacks through enhanced threat assessment and compliance reporting
- Improve security measures through a single point of accountability while reducing overhead and capital expenditures
- Ensure compliance with all federal regulations and industry-specific requirements
- Safeguard company data by using our fully managed MDM platform for all wireless devices

Disaster Recovery as a Service

- Deliver peace of mind with maximum uptime in response to any potential threat with our extensive business contingency planning
- Develop best-in-class virtual solutions with our industry specialists in cloud, on-premise, and hybrid technologies
- Implement business continuity strategies and test them thoroughly to ensure that mission critical data will always be available

We help businesses simplify a complex technology world through our fully managed **Office as a Service**, so our customers can focus on what they do best.
