Managed Mobility Services

We provide an end-to-end, fully managed solution for your mobile assets. This approach empowers you to focus on the revenue-generating, customer-oriented aspects of your business.

Keep Your Data Secure & Remain in Compliance

- Mitigate risk of compromised data by wiping lost and stolen devices
- Maintain compliance with industry and government regulations
- Protect and control corporate assets with end-to-end support of Mobile Device Management (MDM) platform

Streamline Workflow & Increase Employee Productivity

- Reduce demands on your employees with our end-to-end mobility solution
- Optimize time spent on troubleshooting by providing 24/7 help desk services through our US-based communication specialist
- Increase productivity and boost morale by relieving your team of repetitive and low-value tasks

Improve Visibility & Promote Accountability

- Identify and reduce "zombie devices," pay only for what you need
- Promote end-user accountability through mobile policy enforcement
- Target selective deployment of mobile solutions to the right users

Gain Control Over Mobile Usage & Expenses

- Implement proactive plan changes on the fly with real-time usage and notifications
- Promote financial accountability through reporting of indiscriminate use of company resources
- Manage unnecessary expenses through device lifecycle from deployment to retirement

Expense Management / Bill Pay

- Simplify invoice management

- Audit services monthly to identify billing anomalies and control expenses

- Improve employee productivity by streamlining invoice management through a consolidated repository for all services

- Ensure on-time payment of invoices with advance bill payment, eliminating rushed invoice validation

Usage Optimization / Cost Recovery

- Translate usage trends and turn business needs into implemented changes

- Prevent indiscriminate usage through granular reporting

- Recover billing errors via our fully managed bill dispute process

- Provide visibility to end-users and management through shared services charge-back reporting
