

We help businesses simplify a complex technology world.

Managed Security Services

With today's ever-evolving security landscape, proactive monitoring along with customized, multifaceted security responses are needed to keep your organization secure. One Source combines deep industry expertise, world-class threat insights, and unparalleled customer experience to deliver you peace of mind, every time.

Safeguard assets against common threats and sophisticated attacks

- Defend all entry points through robust threat monitoring, breach detection, and intrusion blockage
- Detect full range of threats including advanced attacks and zero-day that others miss
- Deploy Fortune 100-level security ecosystem with full threat management lifecycle support

Enhance security capabilities across entire organization

- Ensure compliance with all regulations through multi-vector security orchestration and audit trails in case of security events
- Build organizational security awareness with trainings and simulation attack exercises

Increase security efficiencies without unnecessary spend on Fortune 100-level infrastructure and talent

- Leverage our highly specialized security experts to provide end-to-end cybersecurity support
- Access the most forefront threat intelligence to identify security incidents and proactively hunt for evolving threat actors
- Provide leading threat protection solutions with automated processes to guard your ecosystem in the cloud, on premise, and in hybrid environments

Examples of Our
Partners

Gain access to the same threat intelligence as the Fortune 100 without the budget.

Our highly skilled experts provide end-to-end Managed Security Services so you do not need to hire, train, and retain talents.

Monitor & Detect

- Monitor the entire security ecosystem including endpoint, network, and email in a single pane of glass
- Identify and detect high-impact malicious activities with superb cybersecurity expertise to prevent breaches
- Provide real-time visibility to all security reporting with customizable dashboard, organizing vetted threats in one location for better communication

Hunt

- Proactively search for malicious threats, indicators, and zero-day vulnerabilities
- Integrate leading threat intelligence throughout the entire security landscape to guide hunting activities
- Gain full threat visibility across all vectors through thorough inspections of network traffic and endpoints

Investigate

- Validate and prioritize threats, analyzing all security alerts using the latest security intelligence
- Conduct a comprehensive assessment of all alert artifacts to determine scope of incidents and extent of compromise
- Diagnose and triage security alerts based on intrusion signs, attackers' operational capabilities, and threat patterns

Respond

- Contain threats rapidly with automated threat notifications and orchestrated security responses
- Develop immediate, customized remediation plans and immunity recommendations to minimize breach impact
- Resolve incidents quickly with our experienced analysts using a systematic approach

We help businesses simplify a complex technology world through our **Managed Security Services** so our customers can focus on what they do best.
