Gain Access to the Same Fortune 100 Security Solutions Without the Budget

Our Managed Security experts provide full-spectrum monitoring and defense services that detect a full range of threats, including advanced and zero-day attacks that other providers miss.

We enhance your end-to-end security capabilities across the entire organization using the following:

- ◆ Robust threat monitoring and breach detection
- ◆ Security awareness training and phishing campaign mitigation
- ◆ Threat intelligence to identify security incidents
- ◆ Proactive hunting for evolving threat actors
- ◆ Ongoing regulatory compliance through multi-vector security orchestration and audit trails

One Source knows organizations have many options when it comes to security services. We act as a partner to our customers, guiding the selection process. We focus on both outcomes and relationships by curating best-in-class solutions from industry-leading companies for our clients. One Source combines deep expertise, world-class threat insights, and unparalleled customer service to deliver peace of mind, every time.

We help businesses simplify a complex technology world

Stop Phishing in its Tracks

More than 90% of cyber security attacks start with email. Companies are having a harder time than ever making sure they are protected. As organizations grow, the potential points of exposure increase exponentially, as does the complexity of those threats.

One Source provides a fully Managed Security awareness solution for small and mid-sized enterprises looking to reduce their risk exposure but are limited by resources or budget. Using the Cofense suite, One Source offers a complete security awareness solution that goes beyond basic awareness simulations. It focuses on driving security education reform that allows clients to track improvements over time and increase their return on investment. Specifically, One Source's program:

- ◇ Prioritizes risks across the entire organization with actionable remediation plans to all threats
- ◇ Identifies organizational loopholes and increases security awareness for the entire employee base, mitigating risks
- ◇ Provides documented analytics to support the awareness program's financial goals and ensure compliance
- ◇ Enables customers to stay ahead of trends with real-time simulations to continue educating and defending client environments

We help businesses simplify a complex technology world

Reach out to us for a free analysis of your Office 365 email environment.

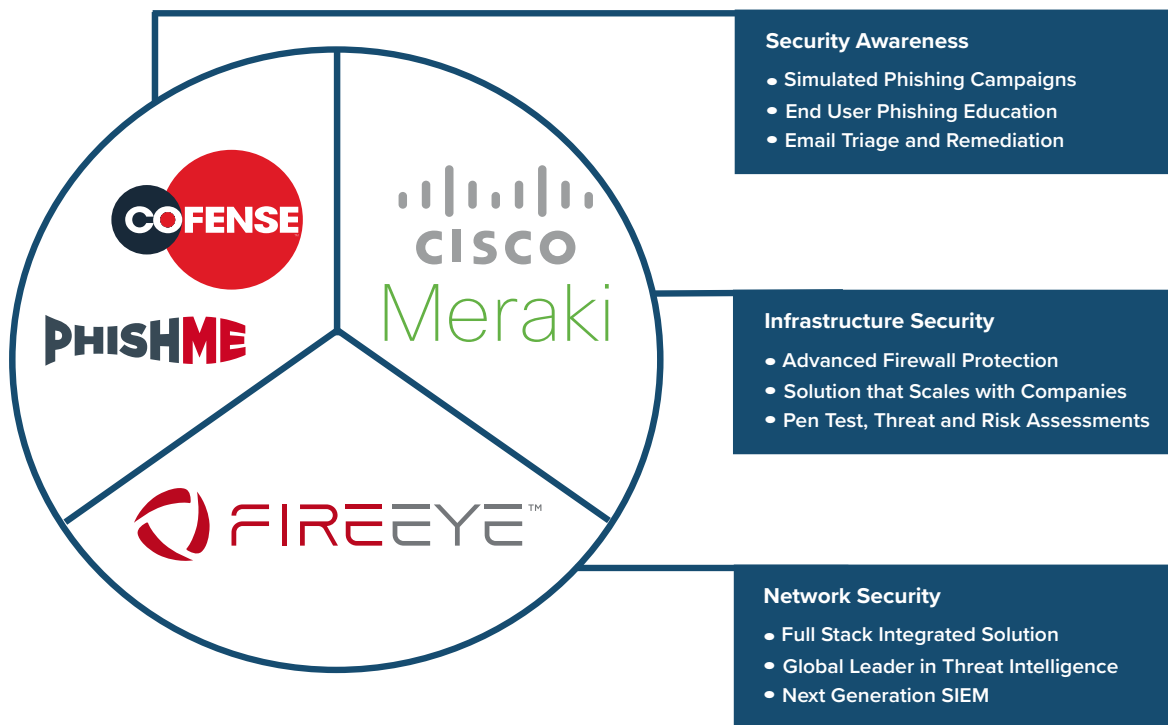

We will conduct a thorough analysis of your company inbox to identify undetected threats that are waiting to turn into malicious attacks.

- 1 Contact us to get started
(877) 651 – 1650
info@onesource.net
- 2 Within a few minutes, our team will pull information from your company's email environment to analyze risks
- 3 Experts from our team and FireEye Threat Intelligence will provide a comprehensive review of threat activities for up to 10,000 emails, along with an overview of the severity of these risks
- 4 Within 2-4 days, we will generate an analysis report for you and discuss findings and recommendations with you

One Source's Managed Security Services bring Fortune 100 solutions to small and mid-sized organizations. Hacking has turned professional. This means mid-sized enterprises now face the same threats as larger corporate entities.

To meet the challenge, One Source partners with FireEye, Cofense, and Cisco Meraki, the world's leading security companies that safeguard Fortune 100s, government security agencies, and nation-states, to create comprehensive Managed Security Services.

These powerful partnerships help One Source protect clients' entire IT infrastructure and help businesses simplify a complex technology world.

We help businesses simplify a complex technology world

Alleviate Administrative Burdens

Mid-sized enterprises are finding themselves buried in escalating administrative work tied to new security compliance requirements. Regulations including GDPR, PCI, DSS, HIPAA, and more, charge business owners with appropriately handling personal information.

One Source relieves the magnitude of these tasks by accessing audit reporting and generating executive summary reports in real time. These capabilities provide huge benefits to smaller IT teams trying to keep up with ever-changing compliance demands.

24/7/365 End-to-End Managed Security Services Support that Eliminate Hiring Needs

Another challenge mid-sized businesses encounter when trying to manage security themselves is the need to hire, train, and retain talent with the right skills. That overhead, combined with the financial drain of enterprise-grade solutions, can be extremely costly.

One Source's analysts possess proven level of expertise and provide around-the-clock support, all at a compelling price point.

We help businesses simplify a complex technology world

Managed Security Operations Centers (SOC) and SOC Labs that Serve the Entire North America

One Source operates three Managed Security Operations Centers (SOC) and SOC labs, providing full coverage from the East Coast to the West Coast. The main SOC is located in Raleigh, N.C., in a former bank vault within North Carolina's first telephone exchange building. Each SOC has a test lab to experiment with different threats and to develop remediations for the constantly evolving threat landscape. The other two SOC and test labs are in Greenville, N.C. and Portland, Ore.

As cyberattacks evolve, with ever greater sophistication, and as hackers grow more opportunistic, One Source stands out as the go-to Managed Security Service Provider for the

mid-market. Operationalizing the latest threat intelligence and technologies from FireEye, Cofense and Cisco Meraki, One Source has developed innovative solutions and strategic processes to bring the best security services and products to small and mid-sized companies, with as few as 100 employees to 10,000 employees, without incurring any extra cost.

In addition to Managed Security, One Source provides fully managed Communications Lifecycle Management (wireline), Managed Mobility Services (mobile), IT Services, and Field Services. Thanks to its specialized staff, One Source generates triple-digit return on investment through contract negotiation, portfolio optimization, and ongoing telecom expense management. One Source provides 24/7 help desk support, procures and provisions telecom and IT, handles all service requests, and manages property acquisition and divestiture.

Because of savings generated through Communications Lifecycle Management and Managed Mobility Services, One Source allows its clients to self-fund One Source's Managed Security Services. This approach empowers businesses to focus on customers and revenue-generating activities.
